Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 May 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Applicant's amendment dated May 15, 2008 has been fully considered.

Applicant argued Raab does not disclose the heating in the 3rd stage in a separate chamber, and many different chambers as claimed. The Examiner agrees. However, a new ground of rejection has been made based on a newly discovered reference from further search. Also, a rejection based on 112, 1st paragraph rejection has been made as follows.

Claims 13-21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

This application has shown the five stages of a rotary combustion engine, but in schematic diagrams only, it's not understood how said five stages are incorporated in a rotary combustion engine. Please provide at least an appendix showing better figures of said engine including the five stages as described. Note the applied reference US 4083663 (Montalvo) in this Office Action which clearly describes how the five strokes and chambers are working in a rotary combustion engine. Please provide similar drawings.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-21 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4083663 (Montalvo).

Montalvo discloses a 5 strokes rotary internal combustion engine comprising a first stage (intake stroke) with the maximum chamber in figure 31, the second stage (compression stroke) with the maximum chamber in figure 32 (smaller than the first stage), the third stage where the combustion take place *in a separate chamber* in figure 34 (note the igniter 103), the fourth stage including the expansion stroke ended in figure 39 with the maximum chamber, and the fifth stage in figures 40-41 with the maximum chamber larger than the fourth stage.
